BICINE
powder

BICINE Parameter Specifications

Name: 2-(Bis (2-hydroxyethyl) amino) acetic acid) N

Package specification: 25kg / barrel, 500g / bottle (other packages can also be customized and need to be communicated with the sales manager in advance)

CAS No.: 150-25-4

Molecular weight: 238.305

Molecular formula: $C_6H_{13}NO_4$

Chloride ion content: < 0.01%

PH application range: 7.6 - 9.0

Purity: $\geq 98\%$

Appearance: white crystal powder

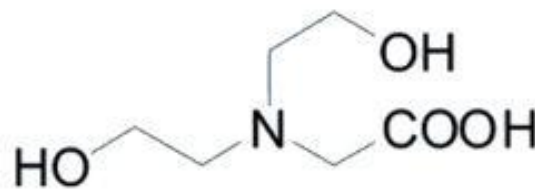

Dissolution: soluble in water, insoluble in acetone, DMF, DMSO and other organic solvents.

Validity period: two years

Storage conditions: sealed at room temperature, away from light and moisture.

Reminder: it is recommended not to use when there are impurities, foreign matters, abnormal smell, abnormal color and expiration date in the product package.

Chemical Structure:

Bicine
