Carbomer 940 Parameter Specifications

Packaging specification: 20kg/box (other packaging can also be customized, need to communicate with the sales manager in advance)

Appearance: white loose powder, slight odor

Properties: (jelly type) very short rheology, high viscosity, high transparency, low ion resistance resistance, low shear resistance, high yield value (suspendability)

Solubility: Soluble in water, glycerol and ethanol, etc.

Safety: no mold growth in dry state, non-toxic and non-irritating

Validity: Two years

Storage conditions: sealed at room temperature, avoid direct exposure to air and sunlight
